

Image Library Usage Agreement

University of Chicago faculty and staff are asked to please note the following conditions before using an image available on this Web site. Please consult with University Publications regarding any exceptions.

1. Users. The images are intended only for the official use of University of Chicago faculty and staff.
2. Use. The images are intended for University of Chicago news, editorial, public relations, and noncommercial uses only; please do not use an image for personal or other non-University of Chicago purposes. Also, images should be used to benefit and promote the University—not in a manner that harms the University or any individual depicted in a photograph.
3. Permission & Clearances. The images may not be legally available for all uses. Please contact University Publications or the Office of the Legal Counsel with questions regarding a use. Please secure any necessary written permissions or clearances in advance.
4. Credits & Notices. Please note that photography credits and copyright or trademark notices accompany each image and be sure to include them where appropriate.
5. Photographic Images. Use of the photographs must be truthful to the scenes portrayed. In general, manipulation that could be done in a traditional photographic darkroom is permitted. If you have questions regarding a specific modification, contact University Publications. Examples of limitations on manipulations are provided below.

Please feel free to modify in the following ways:

Enlarging or reducing an image
Straight-line cropping
Lightening or darkening the overall image
Lightening or darkening a specific area (dodging and burning) to, for example, open up shadows on a face
Adjusting contrast or color to accommodate technologies and mediums (e.g., printing presses, paper surfaces, inks, and computer screens) to maintain accurate reproduction of the original colors and gray values

Please do not modify in the following ways:

Transferring information from one photograph to another photograph
Transferring information from one part of a photograph to another part of the photograph
Deleting elements from the photograph
Adding elements to the photograph
